

INSURED BY NCUA

Travel Tips

Avoid having your debit or credit card declined when you are out of town, by informing us when you are traveling out of state or out of the country. Be sure to have a back-up method of payment available. Avoid becoming a fraud statistic:

Watch your accounts closely. If you see any suspicious or unusual activity, notify us immediately by telephone or online. We will cancel your card.

Be aware of where you're using your card. If you suspect there's a place where your card was compromised, don't use your card there again.

Your PIN is better than a signature. In situations where you have funds in your account and a signature-based debit card transaction is denied, please try using the PIN (personal identification number) option.
